Protime RCS Transponder

- Ecological – Not disposable
- Rechargeable by Chronolec
- 4 years autonomy
- Detection is done up to 120 km/h
- 2.20 m in height detection

Description

The Protime R.C.S Transponder is part of the new generation of transponders for non-motorized races. It is particularly recommended for cycling, roller-skating, skiing, running.

This transponder is delivered with a Lithium-ion battery. With its small dimensions, it can easily be placed on a belt, around the wrist or the leg without embarrassing the competitor.

Only one inductive charge every 4 years at Chronolec is necessary to maintain the transponders in condition.

The information on the level of charge is sent to the decoder when the transponder passes over the loop
